CONTENTS OF VOLUME 254

No. 1 *January* 1976

PAGE

Studies of the contractility of mammalian myocardium at low rates of stimulation. By D. G. ALLEN, B. R. JEWELL and E. H. WOOD 1

Effects of physiologic alterations on binomial transmitter release at magnesium-depressed neuromuscular junctions. By D. D. BRANISTEANU, M. D. MIYAMOTO and R. L. VOLLE 19

An analysis of the action of cations of the lanthanide series on the mechanical responses of guinea-pig ileal longitudinal muscle. By C. R. TRIGGLE and D. J. TRIGGLE 39

The effects of lanthanum and thulium on the mechanical responses of rat deferens. By V. C. SWAMY, C. R. TRIGGLE and D. J. TRIGGLE 55

The formation of synapses between chick embryo skeletal muscle and ciliary ganglia grown *in vitro*. By W. BETZ 63

Functional and non-functional contacts between ciliary neurones and muscle grown *in vitro*. By W. BETZ 75

Electrical responses of frog taste cells to chemical stimuli. By N. AKAIKE, A. NOMA and M. SATO 87

Activation and inhibition of the lateral hypothalamic neurones elicited by medial forebrain bundle stimulation. By MUNEYUKI ITO 109

A voltage-sensitive persistent calcium conductance in neuronal somata of *Helix*. By R. ECKERT and H. D. LUX 129

Effects of isopropylnoradrenaline on tachyphylaxis of gastrin stimulated gastic acid secretion and mucosal blood flow in the anaesthetized cat. By J. D. REED and J. R. SMY 153

Stoichiometry of sodium and potassium transport in erythrocyte from patients with myotonic muscular dystrophy. By KEITH L. HULL, Jr. and ALLEN D. ROSES 169

Plasma sodium concentration and sodium excretion in the anaesthetized dog. By F. S. NASHAT, J. W. TAPPIN and C. S. WILCOX 183

PAGE

Involvement of Uptake$_2$ in the termination of activity of neurogenic noradrenaline in the rat isolated atrium. By CHRISTOPHER BELL and BRENDA GRABSCH 203

Interaction between the effects of spinal heating and cooling and of injections into a lateral cerebral ventricle of noradrenaline, 5-hydroxytryptamine and carbachol on thermoregulation in sheep. By M. BACON and J. BLIGH 213

No. 2 *January* 1976

Ionic fluxes in rat uterine smooth muscle. By G. HAMON, A. PAPADIMITRIOU and M. WORCEL 229

A non-linear voltage dependent charge movement in frog skeletal muscle. By W. K. CHANDLER, R. F. RAKOWSKI and M. F. SCHNEIDER 245

Effects of glycerol treatment and maintained depolarization on charge movement in skeletal muscle. By W. K. CHANDLER, R. F. RAKOWSKI and M. F. SCHNEIDER 285

The voltage dependence of membrane capacity. By R. H. ADRIAN and W. ALMERS 317

Charge movement in the membrane of striated muscle. By R. H. ADRIAN and W. ALMERS 339

Charge movement and mechanical repriming in skeletal muscle. By R. H. ADRIAN, W. K. CHANDLER and R. F. RAKOWSKI . . . 361

The effects of corticosterone and cortisone on the uptake of polyvinyl pyrrolidone and the transmission of immunoglobulin G by the small intestine in young rats. By B. MORRIS and R. MORRIS . 389

Visual identification of two kinds of nerve cells and their synaptic contacts in a living autonomic ganglion of the mudpuppy (*Necturus maculosus*). By U. J. MCMAHAN and D. PURVES 405

An electrophysiological study of chemical and electrical synapses on neurones in the parasympathetic cardiac ganglion of the mudpuppy, *Necturus maculosus*: evidence for intrinsic ganglionic innervation. By S. ROPER 427

The acetylcholine sensitivity of the surface membrane of multiply-innervated parasympathetic ganglion cells in the mudpuppy before and after partial denervation. By S. ROPER . . 455

PAGE

Stimulus-secretion coupling processes in brain: analysis of noradrenaline and gamma-aminobutyric acid release. By CARL W. COTMAN, JOHN W. HAYCOCK and W. FROST WHITE . . . 475

Muscle responses during sudden falls in man. By RICHARD GREENWOOD and ANTHONY HOPKINS 507

Increase by visual stimuli in turnover of 5-hydroxytryptamine in the superior colliculi of the rabbit. By K. FUKUI and MARTHE VOGT 519

Oxygen consumption of the small intestine in normal and hypothyroid rats. By J. R. BRONK, H. J. LEESE and D. S. PARSONS . 531

The contractile properties of slow muscle fibres in sheep extraocular muscle. By J. S. BROWNE 535

No. 3 *January* 1976

The effects of lithium and sodium on the potassium conductance of snail neurones. By L. DONALD PARTRIDGE and R. C. THOMAS . 551

The contractile state of rabbit papillary muscle in relation to stimulation frequency. By K. A. P. EDMAN and M. JÓHANNSSON . 565

Pancreatic acinar cells: the role of calcium in stimulus secretion coupling. By O. H. PETERSEN and N. UEDA 583

Membrane currents of the tunicate egg under the voltage clamp condition. By HARUMASA OKAMOTO, KUNITARO TAKASHI and MITSUNOBU YOSHII 607

Effects of glucose on $^{45}Ca^{2+}$ uptake by pancreatic islets as studied with the lanthanum method. By B. HELLMAN, J. SEHLIN and I.-B. TÄLJEDAL 639

The thermoregulatory responses of the Galago (*Galago crassicaudatus*), the baboon (*Papio cynocephalus*) and the chimpanzee (*Pan satyrus*) to heat stress. By PETER G. HILEY 657

Developmental aspects of potassium flux and permeability of the embryonic chick heart. By EDWARD E. CARMELIET, C. RUSSELL HORRES, MELVYN LIEBERMAN and JOHAN S. VEREECKE . . 673

Aerobic recovery metabolism following a single isometric tetanus in frog sartorius muscle at 0° C. By MARTIN J. KUSHMERICK and RICHARD J. PAUL 693

PAGE

Relationship between initial chemical reactions and oxidative recovery metabolism for single isometric contractions of frog sartorius at 0° C. By MARTIN J. KUSHMERICK and RICHARD J. PAUL 711

Effects of atropine, injected into a lateral cerebral ventricle of the rabbit, on fevers due to intravenous leucocyte pyrogen and hypothalamic and intraventricular injections of prostaglandin E_1. By K. E. COOPER, E. PRESTON and W. L. VEALE 729

The effects of ouabain and ethacrynic acid on the intracellular sodium and potassium concentrations in renal medullary slices incubated in cold potassium-free Ringer solution and re-incubated at 37° C in the presence of external potassium. By R. O. LAW . 743

Isolation of rod and cone contributions to cat ganglion cells by a method of light exchange. By R. W. RODIECK and W. A. H. RUSHTON 759

Cancellation of rod signals by cones, and cone signals by rods in the cat retina. By R. W. RODIECK and W. A. H. RUSHTON . . 775

The effect of zinc of the late displacement current in squid giant axons. By H. MEVES 787

The effect of acetazolamide on ion transport across isolated sheep rumen epithelium. By D. EMANOVIĆ, F. A. HARRISON, R. D. KEYNES and J. C. RANKIN 803

Secretin-like choleretic effect of prostaglandins E_1 and E_2 in cats. By N. KRARUP, J. A. LARSEN and A. MUNCK 813

A diurnal rhythm in the absorption of glucose and water by isolated rat small intestine. By R. B. FISHER and M. L. G. GARDNER 821

Frequency-related inhibitory mechanisms controlling rhythmical activity in the septal area. By H. MCLENNAN and J. J. MILLER . 827

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

19–20 *September* 1975

SUBJECT INDEX

Absorption, the relationship between plasma angiotensin II concentrations and fluid transport by rat jejunum *in vivo*, **254,** 81*P*
a diurnal rhythm in the – of glucose and water by isolated rat small intestine, **254,** 821
Acetazolamide, the effect of – on ion transport across isolated sheep rumen epithelium, **254,** 803
Acetylcholinesterase, regional distribution of choline acetyltransferase and – in the rat amygdaloid complex, **254,** 19*P*
Adrenal, endocrine responses to hypoxia in the conscious calf, **254,** 29*P*
Alarm, the effect of – on the spontaneous activity of neurones in the cerebral cortex of the unrestrained cat, **254,** 33*P*
Amygdala, regional distribution of choline acetyltransferase and acetylcholinesterase in the rat amygdaloid complex, **254,** 19*P*
Amylase, action of neurotransmitter substances on parotid amylase secretion (mouse), **254,** 38*P*
Angiotensin, the relationship between plasma – II concentrations and fluid transport by rat jejunum *in vivo*, **254,** 81*P*
Atrial muscle, effects of atropine on membrane currents and twitch tension in bullfrog atrium, **254,** 44*P*
Atrial receptors, a possible bioassay for the humoral agent responsible for the diuresis from – (dog), **254,** 59*P*
Atropine, effects of – on membrane currents and twitch tension in bullfrog atrium, **254,** 44*P*
effects of –, injected into a lateral cerebral ventricle of the rabbit, on fevers due to intravenous leucocyte pyrogen and hypothalamic and intraventricular injections of prostaglandin E_1, **254,** 729
Autonomic ganglion, visual identification of two kinds of nerve cells and their synaptic contacts in a living – of the mudpuppy (*Necturus maculosus*), **254,** 405
an electrophysiological study of chemical and electrical synapses on neurones in the parasympathetic cardiac ganglion of the mudpuppy *Necturus maculosus*: evidence for intrinsic ganglionic innervation, **254,** 427
the acetylcholine sensitivity of the surface membrane of multiply-innervated parasympathetic ganglion cells in the mudpuppy before and after partial denervation, **254,** 455

Baroreceptor reflex, cardiac output changes during carotid sinus – in the rabbit, **254,** 54*P*
Bile secretion, secretion-like choleretic effect of prostaglandin E_1 and E_2 in cats, **254,** 813
Blood flow, measurement of – in rabbit skin homografts and autografts using a ^{133}Xe clearance technique, **254,** 32*P*
Brain, stimulus-secretion coupling processes in –: analysis of noradrenaline and gamma-aminobutyric acid release (mouse), **254,** 475

Calcium, transplacental total and ionic-gradients in conscious sheep, **254,** 14*P*
an analysis of the action of cations of the lanthanide series on the mechanical responses of guinea-pig ileal longitudinal muscle, **254,** 39
the effects of lanthanum and thulium on the mechanical responses of rat vas deferens, **254,** 55
stimulus-secretion coupling processes in brain: analysis of noradrenaline and gamma-aminobutyric acid release (mouse), **254,** 475
pancreatic acinar cells: the role of – in stimulus secretion coupling, **254,** 583
Calcium conductance, a voltage-sensitive persistent – in neuronal somata of *Helix*, **254,** 129
Calcium fluxes, effects of glucose on $^{45}Ca^{2+}$ uptake by pancreatic islets as studied with the lanthanum method (mouse), **254,** 639
Camel, the rumen as a reservoir during dehydration and rehydration in the –, **254,** 76*P*
Cardiac muscle, studies of the contractility of mammalian myocardium at low rates of stimulation (cat), **254,** 1
the contractile state of rabbit papillary muscle in relation to stimulation frequency, **254,** 565
Cardiac output, – changes during carotid sinus baroreceptor reflex in the rabbit, **254,** 54*P*

Cardiac Purkinje fibres, the effects of ouabain on interval duration relationships in sheep Purkinje fibres, **254,** 45*P*

Cardiac reflex, interactions between – from the lungs and those elicited from the carotid bodies and larynx in the dog, **254,** 55*P*

Cardiac vagal centre, tonic diencephalic inhibition of the – in the cat, **254,** 62*P*

Catechol convulsions, effects of cholinergic drugs on catechol evoked convulsions, **254,** 36*P*

Catecholamine release, the release of catecholamines from perfused canine adrenal glands by corticosteroids, **254,** 30*P*

Cerebral blood flow, – and cerebral metabolic rate during prolonged epileptic seizures in rats, **254,** 61*P*

Charge movement, a non-linear voltage dependent – in frog skeletal muscle, **254,** 245

effects of glycerol treatment and maintained depolarization on – in skeletal muscle (frog), **254,** 285

– in the membrane of striated muscle (frog), **254,** 339

– and mechanical repriming in skeletal muscle (frog), **254,** 361

Circulation, the effect of hypothermia on the – of the rat, **254,** 51*P*

Colour vision, some properties of the blue cone mechanism of the eye, **254,** 1*P*

transient tritanopia: evidence for interaction between colour mechanisms, **254,** 66*P*

Contractility, the contractile state of rabbit papillary muscle in relation to stimulation frequency, **254,** 565

Corticosteroids, the release of catecholamines from perfused canine adrenal glands by –, **254,** 30*P*

Cortisol, relation between blood levels of – and duration of human labour, **254,** 12*P*

Cross-innervation, effects of cross-suturing the submandibular sympathetic trunk to the chorda in cats, **254,** 25*P*

Cutaneous nerves, coupling between – (cat), **254,** 37*P*

Denervation supersensitivity, the acetylcholine sensitivity of the surface membrane of multiply-innervated parasympathetic ganglion cells in the mudpuppy before and after partial denervation, **254,** 455

Development, developmental aspects of potassium flux and permeability of the embryonic chick heart, **254,** 673

Diencephalon, tonic diencephalic inhibition of the cardiac vagal centre in the cat, **254,** 62*P*

Displacement current, the effect of zinc of the late – in squid giant axons, **254,** 787

Diuresis, a possible bioassay for the humoral agent responsible for the – from atrial receptors (dog), **254,** 59*P*

Diurnal rhythm, a – in the absorption of glucose and water by isolated rat small intestine, **254,** 821

Divalent cations, pancreatic acinar cells: the role of calcium in stimulus secretion coupling (rat), **254,** 583

Dorsal horn neurones, selective inhibition of – in the cat, **254,** 72*P*

Egg membrane, membrane currents of the tunicate egg under the voltage clamp condition, **254,** 607

End plate, dose–response curves with labelled sodium and labelled decamethonium in rat muscle, **254,** 43*P*

Epileptic seizures, cerebral blood flow and cerebral metabolic rate during prolonged – in rats, **254,** 61*P*

Erythrocytes, stoichiometry of sodium and potassium transport in – from patients with myotonic muscular dystrophy, **254,** 169

Ethacrynic acid, the effects of ouabain and – on the intracellular sodium and potassium concentrations in renal medullary slices incubated in cold potassium-free Ringer solutions and re-incubated at 37° C in the presence of external potassium (rat), **254,** 743

Extraocular muscle, the contractile properties of slow muscle fibres in sheep –, **254,** 535

Falls, muscle responses during sudden – in man, **254,** 507

Fever, effects of atropine, injected into a lateral cerebral ventricle of the rabbit, on – due to intravenous leucocyte pyrogen and hypothalamic and intraventricular injections of prostaglandin E_1, **254,** 729

Foetus, the effects of adrenalectomy and hypophysectomy in the foetal lamb, **254,** 15*P*

Gall bladder, enhanced fluid transfer by the – following intravesicular pressure induced by spasmogens, **254,** 82*P*

Ganglion cells, isolation of rod and cone contributions to cat – by a method of light exchange, **254,** 759
cancellation of rod signals by cones, and cone signals by rods in the cat retina, **254,** 775
Gastric emptying, the measurement of – in pigs by a double marker technique, **245,** 77*P*
Gastrin, effects of isopropylnoradrenaline on tachyphylaxis of – stimulated gastric acid secretion and mucosal blood flow in the anaesthetized cat, **254,** 153
Glia, respiration and metabolic compartmentation in brain slices from a – deficient mutant, the Jimpy mouse, **254,** 22*P*
Glucose, effects of – on $^{45}Ca^{2+}$ uptake by pancreatic islets as studied with the lanthanum method (mouse), **254,** 639
a diurnal rhythm in the absorption of – and water by isolated rat small intestine, **254,** 821
Glutamate noise, the time course of action of L-glutamate at the excitatory neuromuscular junction in *Maia squinado*, **254,** 47*P*
Glutamate synapse, factor affecting the time course of decay of excitatory postsynaptic currents at a –, **254,** 46*P*
Glycerol, effects of – treatment and maintained depolarization on charge movement in skeletal muscle (frog), **254,** 285
Gustatory sweating, physiological –, **254,** 74*P*

Heart, involvement of uptake$_2$ in the termination of activity of neurogenic noradrenaline in the rat isolated atrium, **254,** 203
developmental aspects of potassium flux and permeability of the embryonic chick –, **254,** 673
Histamine, suppression of – leucocytosis by metiamide (dog), **254,** 31*P*
effects of – on ionic distribution in bovine tracheal smooth muscle, **254,** 63*P*
5-hydroxytryptamine, increase by visual stimuli in turnover of – in the superior colliculi of the rabbit, **254,** 519
Hypothalamus, electrophysiological evidence for axon collaterals in the tuberoinfundibular system of the rat, **254,** 20*P*
Hypothermia, the effect of – on the circulation of the rat, **254,** 51*P*
Hypoxia, endocrine responses to – in the conscious calf, **254,** 29*P*

Immunoglobulin, the effects of corticosterone and cortisone on the uptake of polyvinyl pyrrolidone and the transmission of – G by the small intestine in young rats, **254,** 389
Inflammation, simultaneous measurement of local plasma exudation and blood flow changes induced by intradermal injection of vasoactive substances, using [^{131}I] albumen and ^{133}Xe (rabbit), **254,** 4*P*
a double chamber for the perfusion of an inflammatory lesion in sheep, **254,** 8*P*
Insulin, effects of infusion of volatile fatty acids into the rumen on – release in sheep, **254,** 80*P*
Intestinal absorption, the effects of corticosterone and cortisone on the uptake of polyvinyl pyrrolidone and the transmission of immunoglobulin G by the small intestine in young rats, **254,** 389
Intestinal activity, interaction of duodenal and antral activity in sheep and dogs, **254,** 79*P*
Intestinal nerves, effect of actively transported hexoses on afferent nerve discharge from rat small intestine *in vivo* **254,** 75*P*
Intestine, the effects of non-transportable competitive inhibitors of sugar transfer on the short-circuit current of the rat everted small –, **254,** 50*P*
a diurnal rhythm in the absorption of glucose and water by isolated rat small –, **254,** 821
Ion transport, the effect of acetazolamide on – across isolated sheep rumen epithelium, **254,** 803
Irritant reflex, the effects of some airway – upon mucus secretion from the trachea (cat), **254,** 58*P*
Isoprenaline, effects of isopropylnoradrenaline on tachyphylaxis of gastrin stimulated gastric acid secretion and mucosal blood flow in the anaesthetized cat, **254,** 153

Labour, relation between blood levels of cortisol and duration of human –, **254,** 12*P*
Lanthanide, an analysis of the action of cations of the – series on the mechanical responses of guinea-pig ileal longitudinal muscle, **254,** 39
the effects of lanthanum and thulium on the mechanical responses of rat vas deferens, **254,** 55

Lateral geniculate nuclear cells, properties of sustained-X, transient-Y and transient-X cells in the cat's lateral geniculate nucleus, **254,** 65*P*

Lateral hypothalamus, activation and inhibition of the lateral hypothalamic neurones elicited by medial forebrain bundle stimulation (rat), **254,** 109

Leucocytosis, suppression of histamine – by metiamide (dog), **254,** 31*P*

Lithium, the effects of – and sodium on the potassium conductance of snail neurones, **254,** 551

Mechanical repriming, charge movement and – in skeletal muscle (frog), **254,** 361

Medial forebrain bundle, activation and inhibition of the lateral hypothalamic neurones elicited by – stimulation (rat), **254,** 109

Membrane capacity, the voltage dependence of – (frog), **254,** 317

Membrane charges, charge movement in the membrane of striated muscle (frog), **254,** 339

Mucus, the effects of some airway irritant reflexes upon – secretion from the trachea (cat), **254,** 58*P*

Muscle, the effect of low-sodium solution and lanthanum on the sodium activity of crab – fibres, **254,** 40*P*

heat production during small length changes in active – (frog), **254,** 42*P*

aerobic recovery metabolism following a single isometric tetanus in frog sartorius muscle at 0° C, **254,** 693

relationship between initial chemical reactions and oxidative recovery metabolism for single isometric contractions of frog sartorius at 0° C, **254,** 711

Muscle development, development of slow and fast muscles in chick embryo, **254,** 24*P*

Muscle heat, heat production and chemical change in frog sartorius; a comparison of *R. pipiens* with *R. temporaria*, **254,** 41*P*

Muscle response, – during sudden falls in man, **254,** 507

Muscle spindles, time course of activity in intrafusal fibres in isolated cat muscle spindles, **254,** 23*P*

Myocardium, studies of the contractility of mammalian – at low rates of stimulation (cat), **254,** 1

Myotonic muscular dystrophy, stoichiometry of sodium and potassium transport in, erythrocytes from patients with –, **254** 169

Nasal stimulation, effects of – on the small intestinal vasculature of the anaesthetized cat, **254,** 53*P*

Nerve, effects of cross-suturing the submandibular sympathetic trunk to the chorda in cats, **254,** 25*P*

effect of ions and temperature on the efflux of orthophosphate from rabbit vagus – fibres, **254,** 64*P*

Neuromuscular junction, effects of physiologic alterations on binomial transmitter release at magnesium-depressed – (frog), **254,** 19

the time course of action of L-glutamate at the excitatory – in *Maia squinado*, **254,** 47*P*

the formation of synapses between chick embryo skeletal muscle and ciliary ganglia grown *in vitro*, **254,** 63

functional and non-functional contacts between ciliary neurone and muscle grown *in vitro* (chick), **254,** 75

Neuronal chemosensitivity, the acetylcholine sensitivity of the surface membrane of multiply-innervated parasympathetic ganglion cells in the mudpuppy before and after partial denervation, **254,** 455

Neurones, a method for demonstrating the topographical relationship between monoamine-containing terminals and intracellularly stained – (cat), **254,** 6*P*

the effect of alarm on the spontaneous activity of neurones in the cerebral cortex of the unrestrained cat, **254,** 33*P*

a voltage-sensitive persistent calcium conductance in neuronal somata of *Helix*, **254,** 129

the effects of lithium and sodium on the potassium conductance of snail –, **254,** 551

frequency-related inhibitory mechanisms controlling rhythmical activity in the septal area (rat), **254,** 827

Neurophysiology, the use of a digital computer in the study of neuronal properties in the visual system, **254,** 2*P*

electrophysiology of endocrine sex (rat), **254,** 18*P*

Nitrogen intake, the effect of reducing dietary nitrogen and of infusing urea on glomerular filtration rate and renal plasma flow in sheep, **254,** 73*P*

Noradrenaline, is – the motor transmitter in the mouse vas deferens?, **254,** 49*P*

involvement of $Uptake_2$ in the termination of activity of neurogenic – in the rat isolated atrium, **254,** 203

Orthophosphate efflux, effect of ions and temperature on the efflux of orthophosphate from rabbit vagus nerve fibres, **254,** 64*P*

Ouabain, the effects of – on interval duration relationships in sheep Purkinje fibres, **254,** 45*P*

the effects of – and ethacrynic acid on the intracellular sodium and potassium concentrations in renal medullary slices incubated in cold potassium-free Ringer solution and re-incubated at 37° C in the presence of external potassium (rat), **254,** 743

Pancreatic acinar cells, –: the role of calcium in stimulus secretion coupling (rat), **254,** 583

Pancreatic islets, effects of glucose on $^{45}Ca^{2+}$ uptake by – as studied with the lanthanum method (mouse), **254,** 639

Parotid secretion, action of neurotransmitter substances on parotid amylase secretion (mouse), **254,** 38*P*

Phosphoryl creatine, aerobic recovery metabolism following a single isometric tetanus in frog sartorius muscle at 0° C, **254,** 693

relationship between initial chemical reactions and oxidative recovery metabolism for single isometric contractions of frog sartorius at 0° C, **254,** 711

Placenta, transplacental total and ionic calcium gradients in conscious sheep, **254,** 14*P*

permeability of sheep – to unmetabolized polar non-electrolytes, **254,** 16*P*

Plasma sodium, – concentration and sodium excretion in the anaesthetized dog, **254,** 183

Polyvinyl pyrrolidone, the effects of corticosterone and cortisone on the uptake of – and the transmission of immunoglobulin G by the small intestine in young rats, **254,** 389

Potassium conductance, the effects of lithium and sodium on the – of snail neurones, **254,** 551

Potassium fluxes, developmental aspects of potassium flux and permeability of the embryonic chick heart, **254,** 673

Pregnancy, endocrinology of – in the hyrax: plasma progesterone concentration and erythrocyte metabolism, **254,** 13*P*

Progesterone, endocrinology of pregnancy in the hyrax: plasma – concentration and erythrocyte metabolism, **254,** 13*P*

Prostaglandin, effects of atropine, injected into a lateral cerebral ventricle of the rabbit, on fevers due to intravenous leucocyte pyrogen and hypothalamic and intraventricular injections of – E_1, **254,** 729

Prostaglandins, secretion-like choleretic effect of – E_1 and E_2 in cats, **254,** 813

Primates, the thermoregulatory responses of the galago (*Galago crassicaudatus*), the baboon (*Papio cynocephalus*) and the chimpanzee (*Pan satyrus*) to heat stress, **254,** 657

Pyrogen, effects of atropine, injected into a lateral cerebral ventricle of the rabbit, on fevers due to intravenous leucocyte – and hypothalamic and intra-ventricular injections of prostaglandin E_1, **254,** 729

Receptor potential, electrical responses of frog taste cells to chemical stimuli, **254,** 87

Recovery metabolism, aerobic recovery metabolism following a single isometric tetanus in frog sartorius muscle at 0° C, **254,** 693

relationship between initial chemical reactions and oxidative – for single isometric contractions of frog sartorius at 0° C, **254,** 711

Renal function, the effect of reducing dietary nitrogen and of infusing urea on glomerular filtration rate and renal plasma flow in sheep, **254,** 73*P*

Renal medulla, the effects of ouabain and ethacrynic acid on the intracellular sodium and potassium concentrations in renal medullary slices incubated in cold potassium-free Ringer solution and re-incubated at 37° C in the presence of external potassium (rat), **254,** 743

Renshaw cells, strychnine-sensitive – inhibition of group 1A excited inhibitory interneurones, **254,** 28*P*

Respiration, – and metabolic compartmentation in brain slices from a glia-deficient mutant, the Jimpy mouse, **254,** 22*P*

oxygen consumption of the small intestine in normal and hypothyroid rats, **254,** 531

Retina, isolation of rod and cone contribution to cat ganglion cells by a method of light exchange, **254,** 759

cancellation of rod signals by cones, and cone signals by rods in the cat –, **254,** 775

Ryhthmical activity, frequency-related inhibitory mechanisms controlling – in the septal area (rat), **254,** 827

Rumen, the – as a reservoir during dehydration and rehydration in the camel, **254,** 76*P*

Rumen epithelium, the effect of acetazolamide on ion transport across isolated sheep –, **254,** 803

Sensorimotor cortex, inhibition of transmission through the spinocervical tract, from localized areas of the – (cat), **254,** 71*P*

Septal area, frequency-related inhibitory mechanism controlling rhythmical activity in the – (rat), **254,** 827

Sex, electrophysiology of endocrine sex (rat), **254,** 18*P*

Sheep, interaction between the effects of spinal heating and cooling and of injections into a lateral cerebral ventricle of noradrenaline, 5-hydroxytryptamine and carbachol on thermoregulation in –, **254,** 213

Skeletal muscle, a non-linear voltage dependent charge movement in frog –, **254,** 245

effects of glycerol treatment and maintained depolarization on charge movement in – (frog), **254,** 285

the voltage dependence of membrane capacity (frog), **254,** 317

charge movement in the membrane of triated muscle (frog), **254,** 339

charge movement and mechanical repriming in – (frog), **254,** 361

Skin, measurement of blood flow in rabbit – homografts and autografts using a ^{133}Xe clearance technique, **254,** 32*P*

Skin blood flow, simultaneous measurement of local plasma exudation and blood flow changes induced by intradermal injection of vasoactive substances, using [^{131}I] albumen and ^{133}Xe (rabbit), **254,** 4*P*

Slow muscle, the contractile properties of – fibres in sheep extraocular muscle, **254,** 535

Slow waves, – in neural records, **254,** 34*P*

Small intestine, oxygen consumption of the – in normal and hypothyroid rats, **254,** 531

Smooth muscle, an analysis of the action of cations of the lanthanide series on the mechanical responses of guinea-pig ileal longitudinal muscle, **254,** 39

the effects of lanthanum and thulium on the mechanical responses of rat vas deferens, **254,** 55

ionic fluxes in rat uterine –, **254,** 229

Snail, a voltage-sensitive persistent calcium conductance in neuronal somata of *Helix*, **254,** 129

Sodium activity, the effect of low-sodium solution and lanthanum on the – of crab muscle fibres, **254,** 40*P*

Sodium excretion, plasma sodium concentration and – in the anaesthetized dog, **254,** 183

Sodium fluxes, dose–response curves with labelled sodium and labelled decamethonium in rat muscle, **254,** 43*P*

Sodium pump, stoichiometry of sodium and potassium transport in erythrocytes from patients with myotonic muscular dystrophy, **254,** 169

Sodium-sensitive micro-electrode, a double-barrelled Na^+ -sensitive microelectrode, **254,** 8*P*

Spinal cord, interaction between the effects of spinal heating and cooling and of injections into a lateral cerebral ventricle of noradrenaline, 5-hydroxytryptamine and carbachol on thermoregulation in sheep, **254,** 213

Spinocervical tract, inhibition of transmission through the – from localized areas of the sensorimotor cortex (cat), **254,** 71*P*

Squid axon, the effect of zinc of the late displacement current in squid giant axons, **254,** 787

Stimulus-secretion coupling, – processes in brain: analysis of noradrenaline and gamma-aminobutyric acid release (mouse), **254,** 475

Stretch reflex, the effect of lesions in the internal capsule and the sensorimotor cortex on servo action in the human thumb, **254,** 27*P*

Strychnine, – sensitive Renshaw cell inhibition of group 1A excited inhibitory interneurones, **254,** 28*P*

Submandibular gland, stimulus-secretion coupling in –: role of cyclic AMP, cyclic GMP and calcium in regulating adrenoreceptor mediated enzyme secretion (guinea-pig), **254,** 10*P*

Sugar transfer, the effects of non-transportable competitive inhibitors of – on the short-circuit current of the rat everted small intestine, **254,** 50*P*

Superior colliculi, increase by visual stimuli in turnover of 5-hydroxytryptamine in the – of the rabbit, **254,** 519

Synapses, visual identification of two kinds of nerve cells and their synaptic contacts in a living autonomic ganglion of the mudpuppy (*Necturus maculosus*), **254,** 405
an electrophysiological study of chemical and electrical – on neurones in the parasympathetic cardiac ganglion of the mudpuppy, *Necturus maculosus*: evidence for intrinsic ganglionic innervation, **254,** 427
Synaptic formation, the formation of synapses between chick embryo skeletal muscle and ciliary ganglia grown *in vitro*, **254,** 63
functional and non-functional contacts between ciliary neurones and muscle grown *in vitro* (chick) **254,** 75

Tachyphylaxis, effects of isopropylnoradrenaline on – of gastrin stimulated gastric acid secretion and mucosal blood flow in the anaesthetized cat, **254,** 153
Taste cells, electrical responses of frog – to chemical stimuli, **254,** 87
Temperature regulation, interaction between the effects of spinal heating and cooling and of injections into a lateral cerebral ventricle of noradrenaline, 5-hydroxytryptamine and carbachol on thermoregulation in sheep, **254,** 213
Thermoelastic heat, heat production during small length changes in active muscle (frog), **254,** 42*P*
Thermoregulation, the thermoregulatory responses of the galago (*Galago crassicaudatus*), the baboon (*Papio cynocephalus*) and the chimpanzee (*Pan satyrus*) to heat stress, **254,** 657
Thoracic visceral afferents, multi-terminal afferent fibres from the thoracic viscera in sympathetic rami communicantes of cats and dogs, **254,** 57*P*
Thyroid, oxygen consumption of the small intestine in normal and hypothyroid rats, **254,** 531
Tissue slices, a hand-held device for the rapid production of thin slices of fresh tissue, **254,** 5*P*
Tracheal smooth muscle, effects of histamine on ionic distribution in bovine –, **254,** 63*P*
Transmitter release, effects of physiologic alterations on binomial – at magnesium-depressed neuromuscular junctions (frog), **254,** 19
stimulus-secretion coupling processes in brain: analysis of noradrenaline and gamma-aminobutyric acid release (mouse), **254,** 475
Tuberoinfundibular neurones. electrophysiological evidence for axon collaterals in the tuberoinfundibular system of the rat, **254,** 20*P*
Tunicate membrane currents of the – egg under the voltage clamp condition, **254,** 607

Uterus, ionic fluxes in rat uterine smooth muscle, **245,** 229

Vas deferens, is noradrenaline the motor transmitter in the mouse –?, **254,** 49*P*
Vasomotor reflex, effects of nasal stimulation on the small intestinal vasculature of the anaesthetized cat, **254,** 53*P*
Vision, properties of sustained-X, transient- and transient-X cells in the cat's lateral geniculate nucleus, **254,** 65*P*
interaction in the human visual system between sinusoidal gratings of harmonically related spatial frequencies, **254,** 67*P*
isolation of rod and cone contributions to cat ganglion cells by a method of light exchange, **254,** 759
cancellation of rod signals by cones, and cone signals by rods in the cat retina, **254,** 775
Visual cortex, periodicity in complex cell responses, **254,** 69*P*
the representation of the horizontal meridian in visual areas II and III of the cat, **254,** 70*P*
Visual stimuli, increase by – in turnover of 5-hydroxytryptamine in the superior colliculi of the rabbit, **254,** 519
Volatile fatty acids, effects of infusion of – into the rumen on insulin release in sheep, **254,** 80*P*

Zinc, the effect of – of the late displacement current in squid giant axons, **254,** 787

CONTENTS OF VOLUME 255

No. 1 *February* 1976

PAGE

Review Lecture. The blood–brain barrier. By HUGH DAVSON . 1

Mode of stimulation by aldosterone of the sodium efflux in barnacle muscle fibres: effects of ouabain, ethacrynic acid, diphenylhydantoin, $(ATPMg)^{2-}$, adenine translocase inhibitors, pyruvate and oxythiamine. By E. EDWARD BITTAR and ROBERT B. TALLITSCH 29

Effect of renin-angiotensins system on sodium intake. By EMMA CHIARAVIGLIO 57

Alterations of synapses on axotomized motoneurones. By LORNE M. MENDELL, JOHN B. MUNSON and JOHN G. SCOTT 67

Analysis of pairs of individual Ia-e.p.s.p.s in single motoneurones. By L. MENDELL and R. WEINER 81

The ionic basis of the resting potential and a slow depolarizing response in Rohon–Beard neurones of *Xenopus* tadpoles. By N. C. SPITZER 105

Centrifugal actions on amacrine and ganglion cells in the retina of the turtle. By P. L. MARCHIAFAVA 137

The temporal and steady-state relationships between activation of the sodium conductance and movement of the gating particles in the squid giant axon. By R. D. KEYNES and E. ROJAS . . 157

The effect of caffeine and tetracaine on the time course of potassium contractures of single muscle fibres. By CARLO CAPUTO . 191

Low resistance junctions between mesoderm cells during development of trunk muscles. By SUSANNA E. BLACKSHAW and ANNE E. WARNER 208

Alterations in resting membrane properties during neural plate stages of development of the nervous system. By SUSANNA A. BLACKSHAW and ANNE E. WARNER 231

Fast axoplasmic transport in the fibres of chromatolysed neurones. By SIDNEY OCHS 249

Cortical suppression of the retino-collicular pathway in the monocularly deprived cat. By NANCY BERMAN and PETER STERLNG . 263

PAGE

Intercellular coupling in the atrio-ventricular node and other tissues of the rabbit heart. By GERALD H. POLLACK 275

Lateral geniculate relay of slowly conducting retinal afferents to cat visual cortex. By B. G. CLELAND, W. R. LEVICK, R. MOSTYN and H. G. WAGNER 299

No. 2 *February* 1976

The physiology and anatomy of long ranging afferent fibres within the spinal cord. By P. D. WALL and R. WERMAN 321

Directional differences of impulse spread in trabecular muscle from mammalian heart. By L. CLERC 335

Ionic currents in the guinea-pig taenia coli. By H. INOMATA and C. Y. KAO 347

Characteristics of the rectifying properties of the sino-atrial node cell of the rabbit. By ISSEI SEYAMA 379

Lactate metabolism in the isolated perfused rat kidney: relations to renal function and gluconeogenesis. By JULIUS J. COHEN and JOHN R. LITTLE 399

Visual cells in the pontine nuclei of the cat. By J. BAKER, A. GIBSON, M. GLICKSTEIN and J. STEIN 415

Potassium and calcium and conductance in slow muscle fibres of the toad. By E. STEFANI and O. D. UCHITEL 435

Two types of extrajunctional L-glutamate receptors in locust muscle fibres. By S. G. CULL-CANDY 449

Acid secretion by guinea-pig isolated stomach. By PAMELA HOLTON and JAN SPENCER 465

Evidence for carrier-mediated uptake and efflux of sugars at the serosal side of the rat intestinal mucosa *in vitro*. By J. R. BRONK and P. A. INGHAM 481

Comparison of vasoactive intestinal peptide and secretin in stimulation of pancreatic secretion. By S. J. KONTUREK, ANNA PUCHER and TADEUSZ RADECKI 497

Visual cortical cells: their developmental properties in normal and dark-reared kittens. By P. BUISSERET and M. IMBERT . . 511

Two components of the calcium current in the egg cell membrane of the tunicate. By HARUMASA OKAMOTO, KUNITARO TAKAHASHI and MITSUNOBU YOSHII 527

PAGE

Absorption from a mixture of seventeen free amino acids by the isolated small intestine of the rat. By M. L. G. GARDNER . . 563

No. 3 *March* 1976

The effect of external calcium and magnesium ions on the response of denervated muscle to acetylcholine. By TESSA GORDON . . 575

Characteristics of the entry process for sodium in transporting epithelia as revealed with amiloride. By A. W. CUTHBERT and W. K. SHUM 587

Estimation of the lifespan of amiloride binding sites in the membranes of toad bladder epithelial cells. By A. W. CUTHBERT and W. K. SHUM 605

Quantitative assessment of the transmission of labelled protein by the proximal and distal regions of the small intestine of young rats. By B. MORRIS and R. MORRIS 619

The effect of low amplitude muscle vibration on the discharge of fusimotor neurones in the decerebrate cat. By JUDY R. TROTT . 635

The membrane potential of rat diaphragm muscle fibres and the effect of denervation. By J. J. BRAY, M. J. HAWKEN, J. I. HUBBARD, SUSAN POCKETT and LEONA WILSON 651

Permeability changes produced by L-glutamate at the excitatory post-synaptic membrane of the crayfish muscle. By KAYOKO ONODERA and A. TAKEUCHI 669

Haemodynamic responses and renin release during stimulation of afferent renal nerves in the cat. By F. R. CALARESU, A. STELLA and A. ZANCHETTI 687

The effect of hypercapnia on a blood–brain barrier mechanism in foetal and new-born sheep. By C. A. N. EVANS, J. M. REYNOLDS, M. L. REYNOLDS and N. R. SAUNDERS 701

The effect of carbon dioxide on the intracellular pH and buffering power of snail neurones. By R. C. THOMAS 715

Separation of two voltage-sensitive potassium currents, and demonstration of a tetrodotoxin-resistant calcium current in frog motoneurones. By ELLEN F. BARRETT and JOHN N. BARRETT . 737

The utilization of glucose and production of lactate by *in vitro* preparations of rat small intestine: effects of vascular perfusion. By P. J. HANSON and D. S. PARSONS 775

SUBJECT INDEX

Acetylcholine, the effect of external calcium and magnesium ions on the response of denervated muscle to – (rat), **255,** 575

Afferent fibres, centrifugal actions of amacrine and ganglion cells in the retina of the turtle, **255,** 137

Afferents, the physiology and anatomy of long ranging afferent fibres within the spinal cord (cat,) **255,** 321

Aldosterone, mode of stimulation by – of the sodium efflux in barnacle muscle fibres: effects of ouabain, ethacrynic acid, diphenylhydantoin, $(ATPMg)^{2-}$, adenine translocase inhibitors, pyruvate and oxythiamine, **255,** 29

estimation of the lifespan of amiloride binding sites in the membranes of toad bladder epithelial cells, **255,** 605

Amacrine cells, centrifugal actions of amacrine and ganglion cells in the retina of the turtle, **255,** 137

Amiloride, characteristics of the entry process for sodium in transporting epithelia as revealed with – (frog), **255,** 587

estimation of the lifespan of – binding sites in the membranes of toad bladder epithelial cells, **255,** 605

Amino acids, absorption from a mixture of seventeen free – by the isolated small intestine of the rat, **255,** 563

Angiotensin, effect of renin – system on sodium intake (rat), **255,** 57

Antibody transmission, quantitative assessment of the transmission of labelled protein by the proximal and distal regions of the small intestine of young rats, **255,** 619

Atrio-ventricular node, intercellular coupling in the – and other tissues of the rabbit heart, **255,** 275

Axoplasmic transport, fast – in the fibres of chromatolysed neurones (cat), **255,** 249

Axotomy, alterations of synapses on axotomized motoneurones (cat), **255,** 67

Blood-brain barrier, Review Lecture, **255,** 1

the effect of hypercapnia on a – mechanism in foetal and new-born sheep, **255,** 701

Buffering power, the effect of carbon dioxide on the intracellular pH and – of snail neurones, **255,** 715

Caffeine, the effect of – and tetracine on the time course of potassium contractures of single muscle fibres (frog), **255,** 191

Calcium, two components of the – current in the egg cell membrane of the tunicate, **255,** 527

the effect of external – and magnesium ions on the response of denervated muscle to acetylcholine (rat), **255,** 575

Calcium conductance, potassium and calcium conductance in slow muscle fibres of the toad, **255,** 435

Calcium currents, separation of two voltage-sensitive potassium currents, and demonstration of a tetrodotoxin-resistant – in frog motoneurones, **225,** 737

Carbon dioxide, the effect of – on the intracellular pH and buffering power of snail neurones, **255,** 715

Cardiac muscle, characteristics of the rectifying properties of the sino-atrial node cells of the rabbit, **255,** 379

Cardiac ventricular muscle, directional differences of impulse spread in trabecular muscle from mammalian heart (calf), **255,** 335

Chromatolysis, fast axoplasmic transport in the fibres of chromatolysed neurones (cat), **255,** 249

Cortical afferents, visual cells in the pontine nuclei of the cat, **255,** 415

Crayfish, permeability changes produced by L-glutamate at the excitatory postsynaptic membrane of the – muscle, **255,** 669

Cyclic AMP, the membrane potential of rat diaphragm muscle fibres and the effect of denervation, **255,** 651

Darkness, visual cortical cells: their developmental properties in normal and dark reared kittens, **255,** 511

Denervation, the membrane potential of rat diaphragm muscle fibres and the effect of –, **255,** 651

Development, low resistance junctions between mesoderm cells during – of trunk muscles (*Xenopus*), **255,** 208

Development, alterations in resting membrane properties during neural plate stages of – of the nervous system, **255,** 231

Ectoderm, alterations in resting membrane properties during neural plate stages of development of the nervous system, **255,** 231
Egg cell membrane, two components of the calcium current in the egg cell membrane of the tunicate, **255,** 527
Electrical-coupling, intercellular coupling in the AV node and other tissues of the rabbit heart, **255,** 275

Foetus, the effect of hypercapnia on a blood–brain barrier mechanism in foetal and new-born sheep, **255,** 701
Frog skin, characteristics of the entry process for sodium in transporting epithelia as revealed with amiloride (frog), **255,** 587
Fusimotor neurones, the effect of low amplitude muscle vibration on the discharge of – in the decerebrate cat, **255,** 635

Ganglion cells, centrifugal actions of amacrine and – in the retina of the turtle, **255,** 137
Gastric acid secretion, acid secretion by guinea-pig isolated stomach, **255,** 465
Gating currents, the temporal and steady-state relationships between activation of the sodium conductance and movement of the gating particles in the squid giant axon, **255,** 157
Geniculate, lateral – relay of slowly conducting retinal afferents to cat visual cortex, **255,** 299
Gluconeogenesis, lactate metabolism in the isolated perfused rat kidney: relations to renal function and –, **255,** 399
Glucose utilization, the utilization of glucose and production of lactate by *in vitro* preparations of rat small intestine: effects of vascular perfusion, **255,** 775
Glutamate, permeability changes produced by L-glutamate at the excitatory postsynaptic membrane of the crayfish muscle, **255,** 669
Glutamate receptors, two types of extrajunctional L-glutamate receptors in locust muscle fibres, **255,** 449

Heart, intercellular coupling in the AV node and other tissues of the rabbit heart, **255,** 275
directional differences of impulse spread in trabecular muscle from mammalian – (calf), **255,** 335
Histamine, acid secretion by guinea-pig isolated stomach, **255,** 465
Hypercapnia, the effect of – on a blood–brain barrier mechanism in foetal and new-born sheep. **255,** 701

Immunoglobulin, quantitative assessment of the transmission of labelled protein by the proximal and distal regions of the small intestine of young rats, **255,** 619
Intestinal absorption, absorption from a mixture of seventeen free amino acids by the isolated small intestine of the rat, **255,** 563
quantitative assessment of the transmission of labelled protein by the proximal and distal regions of the small intestine of young rats, **255,** 619
Intestine, evidence for carrier-mediated uptake and efflux of sugars at the serosal side of the rat intestinal mucosa *in vitro,* **255,** 481
Intracellular pH, the effect of carbon dioxide on the – and buffering power of snail neurones, **255,** 715

Lactate metabolism, – in the isolated perfused rat kidney: relations to renal function and gluconeogenesis, **255,** 399
Lactate production, the utilization of glucose and production of lactate by *in vitro* preparations of rat small intestine: effects of vascular perfusion, **255,** 775
Locust muscle, two types of extrajunctional L-glutamate receptors in – fibres, **255,** 449
Low resistance junctions, – between mesoderm cells during development of trunk muscles (*Xenopus*), **255,** 208

Magnesium, the effect of external calcium and – ions on the response of denervated muscle to acetylcholine (rat), **255,** 575
Membrane potential, the – of rat diaphragm muscle fibres and the effect of denervation **255,** 651
Motoneurones, alterations of synapses on axotomized – (cat), **255,** 67
analysis of pairs of individual Ia-e.p.s.p.s in single – (cat), **255,** 81

Motoneurone, separation of two voltage-sensitive potassium currents, and demonstration of a tetrodotoxin-resistant calcium current in frog –, **255,** 737
Muscle, mode of stimulation by aldosterone of the sodium efflux in barnacle – fibres: effects of ouabain, ethacrynic acid, diphenylhydantoin, $(ATPMg)^{2-}$, adenine translocase inhibitors, pyruvate and oxythiamine, **255,** 29
low resistance junctions between mesoderm cells during development of trunk – (*Xenopus*), **255,** 208
the membrane potential of rat diaphragm – fibres and the effect of denervation, **255,** 651
Muscle fibres, the effect of caffeine and tetracine on the time course of potassium contractures of single – (frog), **255,** 191

Nephrectomy, effect of renin-angiotensin system on sodium intake (rat), **255,** 57
Nerve fibres, fast axoplasmic transport in the fibres of chromatolysed neurones (cat), **255,** 249
Nervous system, alterations in resting membrane properties during neural plate stages of development of the –, **255,** 231
Neuromuscular junction, permeability changes produced by L-glutamate at the excitatory post-synaptic membrane of the crayfish muscle, **255,** 669
Neurones, the ionic basis of the resting potential and a slow depolarizing response in Rohon–Beard – of *Xenopus* tadpoles, **255,** 105

Pancreatic secretion, comparison of vasoactive intestinal peptide and secretin in stimulation of – (cat, dog), **255,** 497
pH, the effect of carbon dioxide on the intracellular – and buffering power of snail nuerones, **255,** 715
Pontine nuclei, visual cells in the – of the cat, **255,** 415
Potassium conductance, potassium and calcium conductance in slow muscle fibres of the toad, **255,** 435
Potassium contractures, the effect of caffeine and tetracine on the time course of – of single muscle fibres (frog), **255,** 191
Potassium currents, separation of two voltage-sensitive –, and demonstration of a tetrodotoxin-resistant calcium current in frog motoneurones, **255,** 737

Quantal analysis, analysis of pairs of individual Ia-e.p.s.p.s in single motoneurones (cat), **255,** 81

Receptive field, cortical suppression of the retino-collicular pathway in the monocularly deprived cat, **255,** 263
visual cortical cells: their developmental properties in normal and dark reared kittens, **255,** 511
Receptors, two types of extrajunctional L-glutamate – in locust muscle fibres, **255,** 449
Renal metabolism, lactate metabolism in the isolated perfused rat kidney: relations to renal function and gluconeogenesis, **255,** 399
Renal nerves, haemodynamic responses and renin release during stimulation of afferent – in the cat, **255,** 687
Renin, haemodynamic responses and – release during stimulation of afferent renal nerves in the cat, **255,** 687
Resting potential, the ionic basis of the – and a slow depolarizing response in Rohon–Beard neurones of *Xenopus* tadpoles, **255,** 105
Retina, centrifugal actions of amacrine and ganglion cells in the – of the turtle, **255,** 137
lateral geniculate relay of slowly conducting retinal afferents to cat visual cortex, **255,** 299

Secretin, comparison of vasoactive intestinal peptide and secretin in stimulation of pancreatic secretion (cat, dog), **255,** 497
Sino-atrial node, characteristics of the rectifying properties of the – cells of the rabbit, **255,** 379
Skeletal muscle, the effect of external calcium and magnesium ions on the response of denervated muscle to acetylcholine (rat), **255,** 575
Slow muscle, potassium and calcium conductance in – fibres of the toad, **255,** 435
Small intestine, the utilization of glucose and production of lactate by *in vitro* preparations of rat –: effects of vascular perfusion, **255,** 775
Smooth muscle, ionic currents in the guinea-pig taenia coli, **255,** 347
Sodium appetite, effect of renin-angiotensin system on sodium intake (rat), **255,** 57

Sodium currents, the temporal and steady-state relationships between activation of the sodium conductance and movement of the gating particles in the squid giant axon, **255,** 157

Sodium efflux, mode of stimulation by aldosterone of the – in barnacle muscle fibres: effects of ouabain, ethacrynic acid, diphenylhydantoin, $(ATPMg)^{2-}$, adenine translocase inhibitors, pyruvate and oxythiamine, **255,** 29

Sodium transport, characteristics of the entry process for sodium in transporting epithelia as revealed with amiloride (frog), **255,** 587

estimation of the lifespan of amiloride binding sites in the membranes of toad bladder epithelial cells, **255,** 605

Somatosensory system, the physiology and anatomy of long ranging afferent fibres within the spinal cord (cat), **255,** 321

Spinal cord, the physiology and anatomy of long ranging afferent fibres within the – (cat), **255,** 321

Squid axon, the temporal and steady-state relationships between activation of the sodium conductance and movement of the gating particles in the squid giant axon, **255,** 157

Stomach, acid secretion by guinea-pig isolated –, **255,** 465

Sugar transport, evidence for carrier-mediated uptake and efflux of sugars at the serosal side of the rat intestinal mucosa *in vitro*, **255,** 481

Superior colliculus, cortical suppression of the retino-collicular pathway in the monocularly deprived cat, **255,** 263

Synapses, alterations of – on axotomized motoneurones (cat), **255,** 67

analysis of pairs of individual Ia-e.p.s.p.s in single motoneurones (cat), **255,** 81

Taenia coli, ionic currents in the guinea-pig –, **255,** 347

Toad bladder, estimation of the lifespan of amiloride binding sites in the membranes of – epithelial cells, **255,** 605

Tunicate, two components of the calcium current in the egg cell membrane of the –, **255,** 527

Vasoactive intestinal peptide, comparison of – and secretin in stimulation of pancreatic secretion (cat, dog), **255,** 497

Vibration, the effect of low amplitude muscle – on the discharge of fusimotor neurones in the decerebrate cat, **255,** 635

Vision, cortical suppression of the retino-collicular pathway in the monocularly deprived cat, **255,** 263

Visual cells, – in the pontine nuclei of the cat, **255,** 415

Visual cortex, lateral geniculate relay of slowly conducting retinal afferents to cat –, **255,** 299

Visual cortical cells, –: their developmental properties in normal and dark reared kittens, **255,** 511

Voltage clamp, ionic currents in the guinea-pig taenia coli, **255,** 347

Xenopus, the ionic basis of the resting potential and a slow depolarizing response in Rohon–Beard neurones of – tadpoles, **255,** 105
